

DOE Lessons Learned Template

Title: Separation of Private Vehicles and Commercial Traffic

Date: 07/06/05

Identifier: 2005-RF-15

Lessons Learned Statement: Rerouting traffic and segregating traffic types around the site to reduce the potential of traffic accidents.

Discussion of Activities: The site designed separate routes for privately owned vehicles (POV) and heavy commercial trucks to the greatest extent possible. By eliminating POVs and commercial trucks from traveling the same roads, the site reduced/eliminated the potential of accidents and serious injuries.

Recommended Actions: Suggest each closure site implement this action where practical to reduce the potential of traffic accidents.
